

PEDIATRIC

New Born Nursery

Our team of physicians first examine your child at the hospital nursery at Cabell Huntington Hospital, and then again in their office two or three days after going home from the hospital.

Immunizations

A critical part of your child's health is immunizations to protect your child from disease.

Behavioral Health and Counseling

Valley Health's staff of psychiatrists and therapists can address challenging behavior issues, habits, stress, or emotions of you or your child.

Well Child Visits

Routine visits to our office allow our providers to chart growth, review milestones, and examine your child to ensure their health and well-being.

Dental

Dentists recommend all children have their first dental visit by age one, or when their first tooth erupts.

Optometry

Our providers recommend that children have their first eye exam at 6 months old. We also offer a wide variety of frames, lenses, and contacts for even our littlest patients.

School-Based Clinics

Our school-based health centers provide treatment for acute illnesses, well-child exams, sports physicals, immunizations, health education, and referrals when necessary.

QuickCare

For unexpected illnesses or minor injuries, children can be seen without an appointment at our QuickCare locations, which are often after hours.
